After everything was packed up, Brian, Doug, Randy, and Vic drove over to help Gus search for his missing rocket. After searching the woods, ravines and houses for an hour or so, Gus "I really should have used a smaller motor and parachute" Piepenburg and the rest of the group gave up the search and went home. Everyone came home, tired, happy, and sunburned.

The next launch is scheduled for July 12 at Purdy Sod Farm Class 1 rockets only. (Up to 3.3 pounds and 125 grams of propellant almost all H motors are ok so Level 1 certifications ARE permitted).
